I. Introduction

The Office for Victims of Crime (OVC) is a component of the Office of Justice Programs within the U.S. Department of Justice. It serves as the chief advocate within the Department for all crime victim issues. In addition to ensuring that the criminal justice system addresses the victim's legitimate rights and interests, OVC's program activities include providing victim assistance and compensation grants to the states; training and technical assistance; and emergency services to victims of federal crimes. See 42 U.S.C.A. §§ 10601-10605.

II. Program Description

Promising Strategies and Practices for Evidentiary Medical Examinations, Including the Use of Nurse Examiners and Special Settings (Cooperative Agreement).

Award Amount: \$50,000.

Purpose: To encourage the participation of child and adult victims of sexual assault and abuse in the criminal justice process by promoting victim-sensitive practices and settings for the collection of medical evidence.

Background: In many places, adult and child victims of sexual assault and abuse who arrive at hospital emergency rooms often have to contend with a lack of privacy, long waits for doctors who are busy attending to other medical emergencies, a lack of emotional support throughout the forensic examination process, and an impersonal, chaotic environment. These conditions not only compound the trauma experienced by victims, but discourage many victims from coming forward to report the crime or to obtain necessary assistance and medical services. In addition, evidence that is poorly collected and improperly preserved undermines efforts to successfully prosecute and convict sex offenders.

To address these issues, some jurisdictions have developed sexual assault nurse examiner programs, in which nurses who are specially trained to address the medical and emotional needs of victims perform the examinations in a setting especially designed for victims. The intent of these programs is to free doctors to attend to other medical emergencies; to use consistent forensic examination practices to ensure that appropriate steps are followed in collecting, handling, and storing evidence; and, most importantly, to assist child and adult victims in a compassionate and sensitive manner. Various communities have also found that examination rooms designed for victims seem to increase their willingness to participate in the criminal justice process. In addition, they have found that the use of trained nurse examiners can reduce costs and enhance the provision of services. These innovative measures not only reduce trauma to victims; they also result in credible evidence, the basis for successfully prosecuting and convicting sex offenders.

Goals

- To promote the use of sexual assault nurse examiner programs and special settings for evidentiary medical examinations of child and adult victim of sexual assault and abuse.

- To define standards for consistent, compassionate and quality practices in conducting evidentiary medical examinations of child and adult victims of sexual assault and abuse.
